SOCIETY FOR ADMINISTRATION OF TELEMEDICINE AND HEALTHCARE INFORMATICS

ANNUAL REPORT

2023-24

Message from the President

Dear Friends, Partners, and Well-Wishers,

This Annual Report is more than a collection of milestones — it is a celebration of what we have achieved *together*.

The past year brought its share of challenges, but also opportunities — opportunities we seized with determination, innovation, and collaboration. Thanks to the unwavering dedication of our team, the enthusiasm of our volunteers, and the generous contributions of our donors, we have significantly expanded the reach of our Digital Health Assistant (DHA) programs and deepened our impact in the fields of healthcare and digitization.

At the heart of everything we do is a clear and powerful vision:

SATHI aims to be a front runner in the field of Telemedicine and Health Care Informatics through a continuous process of accumulation and upgradation of its knowledge pool. This vision guides all actions and ensures alignment with the core values of the organization.

This guiding vision fuels our strategy and shapes our work. In line with our mission, SATHI actively:

- Participation in technical and financial bids for projects advertised by governments, either independently or in collaboration with other organizations, to achieve specific goals as presented by emerging opportunities.
- Ensure success of projects and then scale up with our project partners even while we remain concentrated on our core values as knowledge managers
- Use the powerful tool of telehealth to bring down the cost of healthcare Participate in medial conferences to showcase application across medical specialties
- Organize conferences and telemedicine tutorials.

- Conducts regular webinars and telemedicine tutorials to expand access to knowledge and training.

We are proud to share our key accomplishments from the past year:

1. **Digital Health Assistant (DHA) Course:** Following the success of our first and second batches, we have successfully launched the third batch, continuing to build a strong cadre of trained Digital Health Assistants.
2. **Student Placement:** A majority of our first-batch DHA trainees are now employed in reputed healthcare institutions in Delhi. Placement interviews for the second batch are actively underway.
3. **Program Expansion:** We are currently engaging with a wider range of institutions and partners to scale the DHA initiative further and bring it to more communities in need.
4. **Centre of Excellence (COE):** In our continued pursuit of excellence, we have launched a dedicated COE — a multidisciplinary hub for research, education, and advanced treatment in lymphatic disorders. This platform is already fostering collaboration, innovation, and improved patient care.

None of this would have been possible without *you* — our partners, allies, and community members. Your support empowers us to dream bigger and reach further.

As we set our sights on the year ahead, we remain energized and optimistic. While challenges persist, our path forward is strengthened by your partnership and belief in what we stand for. Together, we are building a future where technology and compassion unite to make healthcare more accessible and impactful.

Thank you for being a part of SATHI.

Warm regards,

Dr Shashi Gogia, President

Activities of S.A.T.H.I.

DIGITAL Health Assistant
As for the project started on 6 May 2023, we are thrilled to announce its commencement! 🎉 This project is a culmination of our team's hard work, dedication, and passion. We believe that it has the potential to make a

significant impact in its respective field. The journey ahead may be challenging, but we are confident in our abilities to overcome any obstacles that may come our way. We are excited to see how this project evolves and the positive outcomes it will bring. Stay tuned for more updates on our progress!

AICH MEDINFO

Saturday 8 July

1 | 9:00am On the first day of the conference in session 105: **Health data science and artificial intelligence**, learn how Voice BOTS may assist in pre-clinical assessments.

Dr Shashi Gogia, President, Society for Administration of Telemedicine and Healthcare Informatics (SATHI) will run the tutorial. After this in the same session, A/Prof Michelle Barakat-Johnson, Clinical Lead & Nurse Manager of Skin Integrity Sydney Local Health District will discuss the evaluation of an artificial intelligence app to improve wound assessment and management..

Sunday 9 July

3 | 9:00am morning co sessions in 202: **Health data science and artificial intelligence**, learn how Voice BOTS may assist in pre-clinical assessments.

SHOW

4 | 11:00am Down to business workforce.

On 20th June 2023, on the first day of the conference SATHI President Dr. S. B. Gogia represented SATHI in session 105: **Health data science and artificial intelligence**, learn how Voice BOTS may assist in pre-clinical assessments.

On 18th July 2023, LE&RN Centers of Excellence (COE) provide a geographically diverse network of multidisciplinary clinical care and service centers for individuals and

families affected by Lymphatic Diseases

Creating the centers also gives a great opportunity to learn from each other.

As we the India chapter and COE got the opportunity to visit and witnessed COE The ALERT (Australian Lymphoedema Education, Research and Treatment) Program at Macquarie University.

A screenshot of the MEDINFO23 website. The header includes 'MEDINFO23' and navigation links for 'Home' and 'Content'. Below the header is a colorful, abstract banner. The main content area features a video of a man speaking at a podium labeled 'I2G SYDNEY INTERNATIONAL CONVENTION CENTRE' and 'MEDINFO23 THE FUTURE IS ACCESSIBLE'. To the right of the video, the text reads 'MEDINFO23 8-12 JULY 2023 | SYDNEY, AUSTRALIA' and 'Society for Administration of Telemedicine and Healthcare Informatics (SATHI)'. Below this, a list of bullet points describes the society's goals and members. A small group photo is also visible on the right side of the page.

MEDINFO23
8-12 JULY 2023 | SYDNEY, AUSTRALIA

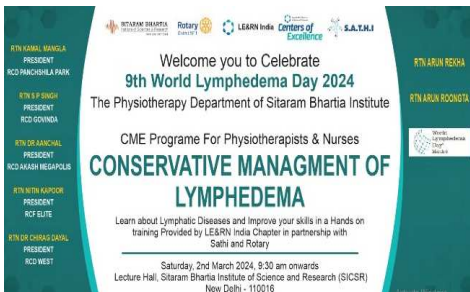

Society for Administration of Telemedicine and Healthcare Informatics (SATHI)

- Registered Not for Profit
- Tech High Achievers working for social causes
 - Doctors from AIIMS (India's top Institution)
 - Engineers
 - Technologists
 - Sociologists
- Contributing Nationally & Internationally through
 - Bureau of Indian Standards /ISO
 - International Medical Informatics Organization
- Track record of successful projects

Our panel presentation at Medinfo23 was placed on the AIDH site.

12 January 2024 – National Conference on Advancing Healthcare Analytics for Better Health Outcomes at IIMHR, Jaipur.

2 March 2024 – Hybrid Workshop on Conservative Management of Lymphedema at Sitaram Bhartia Institute of Science & Research in association with LE&RN.

4 March 2024 – Inauguration of DHA 3rd batch at DCWA. DIGITAL Health Assistant (DHA) project started on 6 May 2023. This project is a culmination of our team's hard work, dedication, and passion. We believe that it has the potential to make a significant impact in its respective field. The journey ahead may be challenging, but we are confident in our abilities to overcome any obstacles that may come our way.

6 March 2024 – World Lymphedema Day Celebration.

On World Lymphedema Day 2024, LE&RN India and Rotary District 3011 organized a Complete Decongestive Treatment (CDT) training at Sitaram

Bhartia Institute, New Delhi. 49 therapists received hands-on training, while 22 joined online, enhancing their expertise in lymphedema management. We thank our esteemed faculty for their support.

9 March 2024 – BVSCON at Dhaka, Bangladesh. The 3rd International Conference of the Bangladesh Vascular Society (BVSCON 2024) was held on March 9, 2024, in Dhaka, Bangladesh. The event brought together renowned international faculty, fostering knowledge exchange on advancements in vascular surgery, innovative treatments, and collaborative efforts to enhance patient care.

17 March 2024 – Our Diploma in Digital Health Assistance (DHA) program is making waves! Featured on Page 8 of this week's Blitz India Magazine, read all about the amazing work of our DHA

Program.

SATHI's
Digital
Health
Assistant
(DHA)
training
program

aims to

bridge the healthcare manpower gap by equipping school pass outs with essential telemedicine and EHR skills. With a focus on grassroots healthcare, the initiative enhances accessibility, fosters career opportunities, and supports India's digital health mission.

30 & 31 March 2024 – In association with AIG Hospitals, a Lymphedema Update on Plastic Reconstructive Surgery was organized in Hyderabad, focusing on advanced surgical techniques and patient care.

In collaboration with AIG Hospitals, a Lymphedema Update Workshop on Plastic Reconstructive Surgery was held on 30–31 March 2024 in Hyderabad. This hands-on session equipped healthcare professionals with advanced surgical techniques, fostering improved patient care and strengthening expertise in lymphedema management.
